Knowledge about antibiotics

94% answer that all doses of prescribed antibiotics have to be taken.

90% believe that they should not use the antibiotics prescribed for other people.

42% think that having same symptom will mean same antibiotics

Knowledge about antibiotic resistance

42 % were aware that antibiotic resistance is one of the biggest problems in the world .

40% of respondents believed not to be at risk as long as they take antibiotics correctly

True/False Quiz

Antibiotic resistance occurs when bacteria develop the ability to survive exposure to antibiotic. This can happens spontaneously or as results of exposure to environmental factors such as antibiotics or other chemicals.

It can be influenced by a variety of factors, including natural selection, genetic mutations, gene transfer, and the overuse and misuse of antibiotics.

Consequences

Longer and more costly hospital stays,

Increased risk of death

Spread of antibiotic-resistant infections to other

WHAT YOU CAN DO ?

Be a smart prescription user

Only use antibiotics when prescribed by a certified health professional

Each dose counts

Follow the prescribed dosage and duration

Keep your medication to yourself

Never share your antibiotics

Prevent infection

Washing your hands, avoiding contact with sick people and keeping your vaccinations up to date.

Get vaccinated

Vaccines are a powerful tool in preventing the spread of infections diseases

You are what you eat

Adopt sustainable systems with improved hygiene, biosecurity and stress-free handling of animals
